

How to find the coordinates for your house

On the 'Dwelling Details' screen of the on-line application form, the following steps can be followed to find the coordinates for your house.

1. Click on the Show map link to the left of the X, Y coordinate field, on the application screen.

Dwelling Map Location

Map coordinates should be input into the fields below to locate each dwelling. Coordinates can be found by clicking on the link 'show map – to locate dwelling' below. Enter your address/Eircode in the search box or zoom to your dwelling. When the cursor is placed over the dwelling, and is stationary, the coordinates displayed at the bottom left of the map view should be noted for input below. Each field should have six digits.

Coordinates should be input within the footprint of the dwelling, as close as possible to the front entrance door.

Close or minimise the map browser window to return to the application.

X Coordinate or Easting:

Y Coordinate or Northing:

2. A map of Ireland will open. You can now find the coordinates of your dwelling by following one of these two options:

| | |
|---|---|
| <p><i>Option 1: Find Coordinates – using Dwelling Eircode</i></p> <p>a. Input your Eircode into the search bar (top left of screen) and click search <i>A pop-up window is displayed over the dwelling.</i></p> <p>b. To find coordinates, in the pop-up window, click on the 3 dots to the bottom right of the window and click 'Add a marker'</p> <p>c. When the marker appears, click on the icon displayed over the dwelling <i>A new window appears with the X, Y coordinates for the location point</i></p> <p>d. In recording the X, Y coordinates, include the digits up to the decimal point, for both X, Y figures displayed.</p> | <p><i>Option 2: Find Coordinates – using Map</i></p> <p>a. Find location of dwelling on map manually (zoom over dwelling to full extent of map)</p> <p>b. Click on located to left of the X, Y coordinates at bottom left of screen on the coordinate widget</p> <div style="border: 1px solid #ccc; background-color: #f0f0f0; padding: 2px; margin: 5px 0;"> + 49,403.930 490,357.782 Meters </div> <p>c. Move the arrow until it is positioned over the dwelling and click once</p> <p>d. A green icon appears over the dwelling. The coordinates for this point are displayed in the fixed X, Y field at the bottom left of the screen.</p> |
|---|---|

3. Take note of the coordinates and input them on the application form.

4. After the coordinates are inputted, a link will appear to the right of the screen to allow the dwelling coordinates to be verified.
